Splash of brilliance

the joy of water for

Luxurious Faucets

elegant & fashionable appearance can embody our pursuing
of perfection & best care to the consumer.

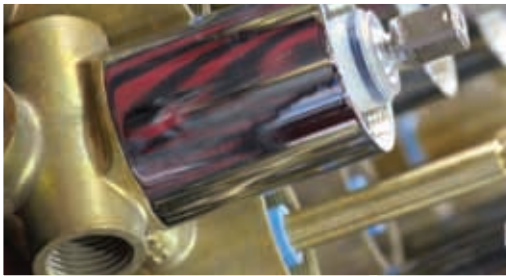

BATH FITTINGS

PRODUCTION PROCESS

The moulding, casting, grinding, polishing, electroplating and even the testing and assembly is done very carefully. We employ the best technology in the field of bathroom fittings. We Use market information and trends to predict demand.

we reimagine your bathroom...

FROM THE DESK OF CHAIRMAN
MR. AJIT GARG

At XEN, we understand the enthusiasm that surrounds home maintenance and renovation projects. That understanding is the foundation of our company's mission: to provide the best selection of faucets, shower systems and accessories on the market. Our products are made to match the style of your home; perfect for kitchens and bathrooms alike.

We have assembled an unparalleled team of employees and created cutting-edge facilities to design, test, improve and refine our products to meet all your fitting needs, poised to provide beautiful and sophisticated high performance faucets and shower systems.

The XEN team spares no effort to guarantee the best possible life span and superior quality for the products we offer. Our XEN products are unique, easy to install and come with a warranty.

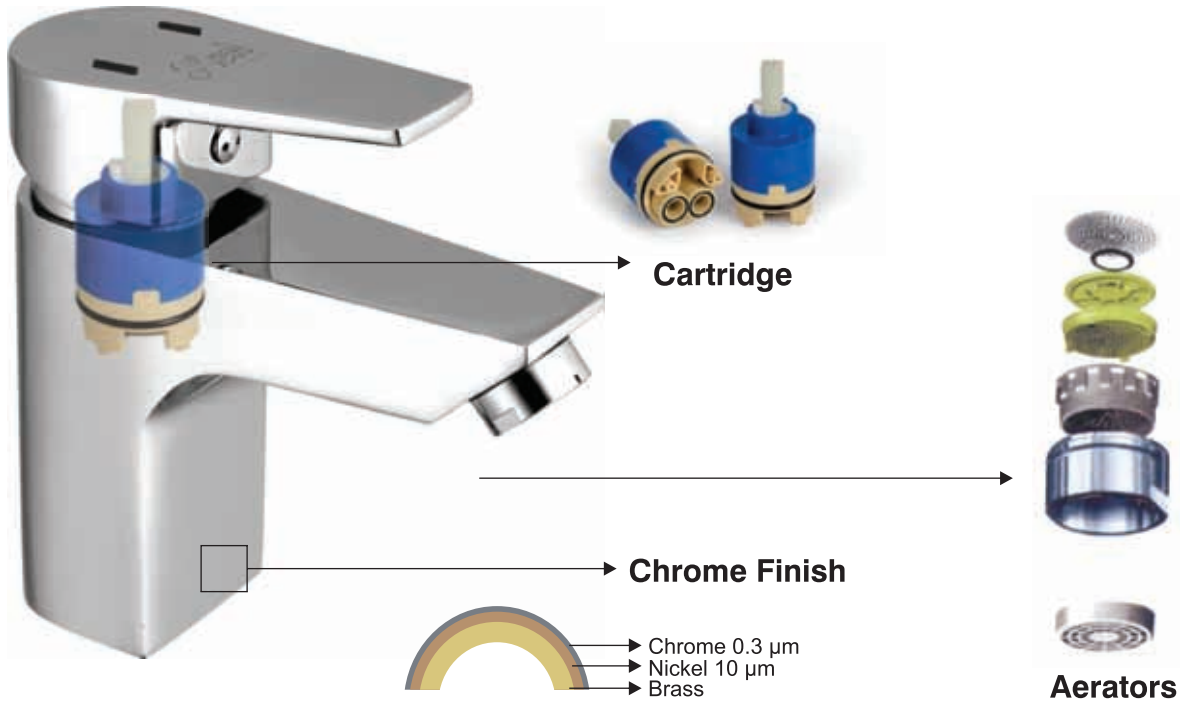

XEN faucets have been designed for easy installation. Mechanical parts are easily accessible from above the counter, making maintenance and cleaning chores much more straightforward.

We equip all our dual-handle lavatory and bathtub faucets with High Standard ceramic cartridges. This ensures their durability and optimum performance for the system.

Our innovations and know-how are sure to exceed all your expectations.

XEN ADVANTAGES

CERAMICS VALVES

XEN uses some of the world's best cartridges from leading European companies. These cartridges are guaranteed for use of more than 3,00,000 cycles.

GREEN TECH

XEN offers a wide array of water saving products from aerators to auto shut taps. These products help conserve more than 50% of water.

GERMAN AERATION TECHNOLOGY

XEN uses world class aerators for its faucets. Neoperl aerators from Germany give the optimum flow quality, avoid water splashing & also conserve water.

LONG LASTING SURFACE FINISH

XEN uses triple layer plating technology to give the most shining and durable finish to its products. The surface finish complies with the most stringent test requirements across the globe.

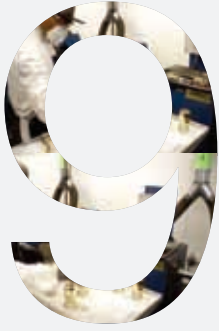

OPERATES SMOOTHLY

Wide-angle lever provides increased comfort and flawless smooth operation.

DESIGN EXPERTISE

Design @ speed of thought. This is what best describes R&D at Xen. Our designers keep exploring new approaches to perform and function, creating the concepts for the future. With some of the best brains in the industry, Xen has the capability to develop the most innovative designs in the shortest possible lead time.

Nine Testing Technology

TEMPERATURE TEST

After more than -20 degree Celcius in the environment for 12 hours, and quickly placed in the environment of 95 degree C, a 24 - hour cycle, continous cycle three times, alternating immersion in hot water at room temperature 80 degree C 40 seconds, and 450 consecutive cycles cross test, with the degree of high precision parts, alternating hot and cold water in case of thermal expansion and contraction synchronous no.

WITH RESISTENCE TEST

More than 60,000 of acidic cleaning agents, surface traces of corrosion-free, perfect corrosion resistance, intimate contact can withstand daily cleaning lotion, kitchen clean from worry.

WEAR TESTING

We only come to trial and precisecosting thickness. It is not easy to peeloff or wear, Xen using the first layer of nickel 10-12 um, the second layer ofchromium 0.25-0.35 um, to achieve the perfect balance of protectionand gloss.

CORROSION TESTING

Neutral salt spray test over 200h, the leading non-erosive, more fumes in the kitchen or bathroom stem environment, also can maintain long-termssurface coatingdoes not rust corrosion, easy to ownpleasant kitchen and living.

ACCURACY TEST

Over 35 Kg pressure, higher than the national standard 25 kg, high strength body, can withstand ultra-high pressure, because no water pressure causes burst pipes and leakage risks.

ILLUMINATION TEST

No natural light or scattered reflected light white transparent light test, the light is not less than 300 Lx, smooth as a mirror bright appearance, highlighting the excellent technology, more kitchen space to bring new highlights.

TEST PRESSURE CONTROL

Bubbler five unique filtrartion, played 0.3Mpa water pressure, flow rate remains constant, the unique blubber, under pressure can suddenly high, maintaining a constant flow rate, eliminating water splash in fear.

CONTROL TONE TEST

In the dynamic pressure 0.3 Mpa, 40 db sound of water, below the S&P Through 50 db, unique quiet technology, enjoy what you want, at home provide a quiet environment to rest.

LIFE TEST

More than 6,00,000 times switch life test, to maintain smooth feel, even if the switch leading 80 times per day, the valve can be used normally for more than 20 years, the quality of life long companions.

SIX TECHNOLOGIES

SHINE LIGHT SYSTEM

Corrosion-resistant high precision surface treatment process, to create a smooth mirror chrome, lasting bright new. So clean no longer troubled, often happy mood.

COMFORTABLE SENSE SYSTEM

Smooth inner wall faucet filter with a five bubbler, let out the water supple and comfortable, and the counterweight unique cold touch means care of the family, feel at ease and comfortable.

PRECISE JOINT SYSTEM

Super precision CNC welding, casting and all intelligent monitoring technology to ensure that you get every faucet Honor are stable quality, long-term use does not produce rust, protect the health of you and your family.

SMART CLEANING SYSTEM

Honor showers were rationed elastic silicone polymer, the easy touch, the scale can be removed to eliminate the dirt to bring clean water to poor and tedious trouble, so that life is no longer bother.

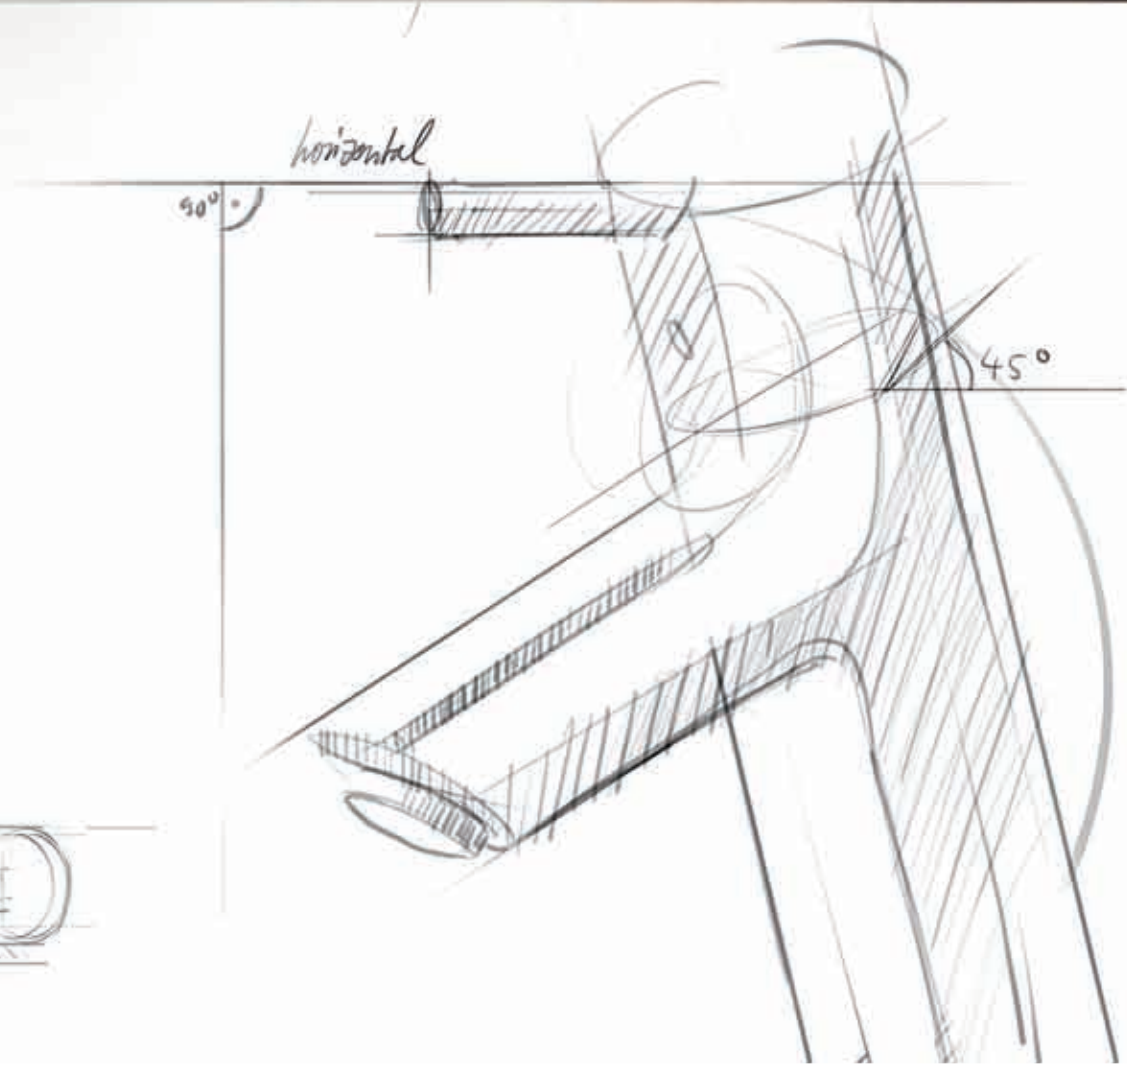

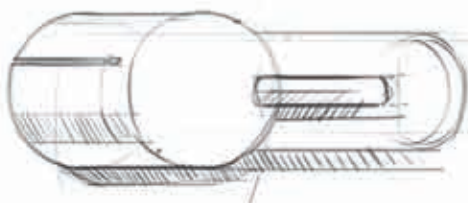

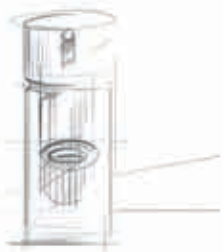

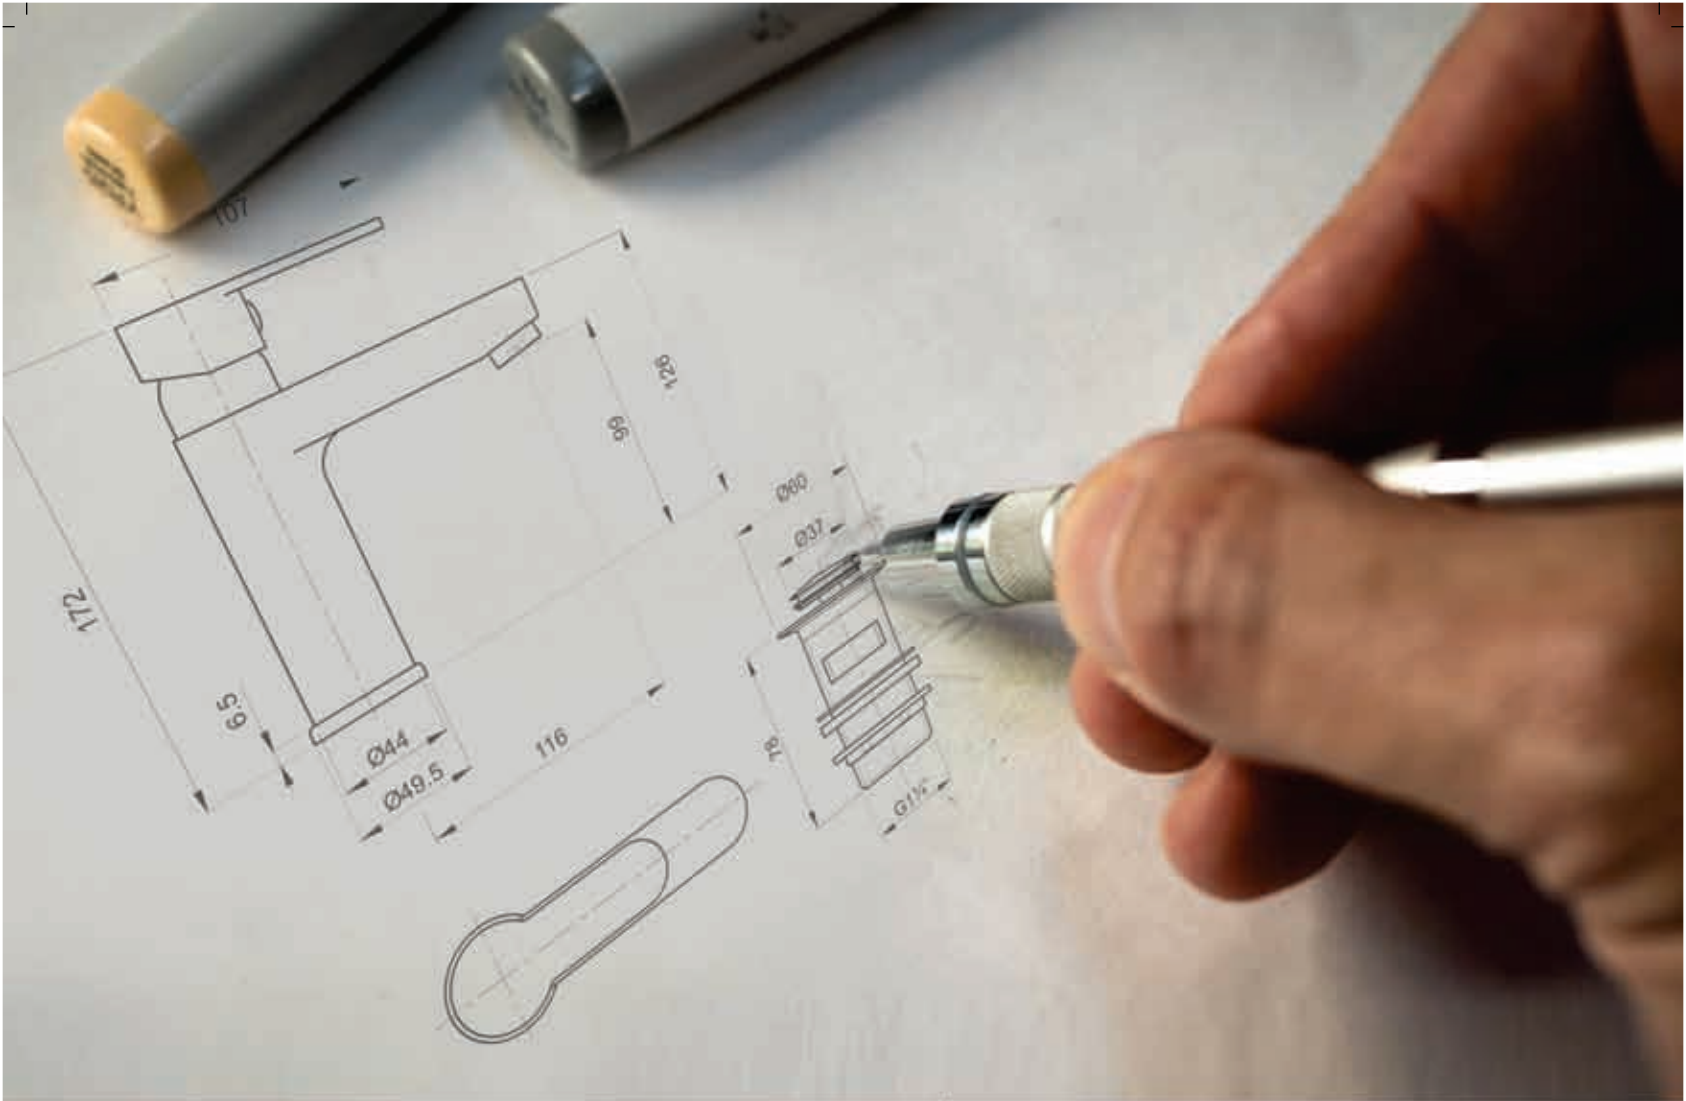

SMOOTH CONTROL SYSTEM

Net imports of wear in the valve tightly closed environment with advanced ceramic alloy and special lubricating coating using hundreds of thousands still has a smooth, give you perfect control experience

WATER CONVERSATION SYSTEM

Instantly adjust the water temperature to the desired temperature, five air fillers ensures low pressure injection type bubbler flow remains constant, reducing commissioning bring water waste, and to ensure a constant high quality of your bathing experience.

AREATORS THAT SAVE WATER

MATRIX FLOW

₹ 900/-

The new MATRIX aerator turns the water stream into an eye-catcher when washing your hands. The integrated PCA® technology enables a virtually constant flow rate of 0.35 gpm (approx. 1.3 litre/min) and 0.5 gpm (approx. 1.9 litre/min) regardless of pressure fluctuations. With less warm water being used, the energy needed to heat it is saved as well.

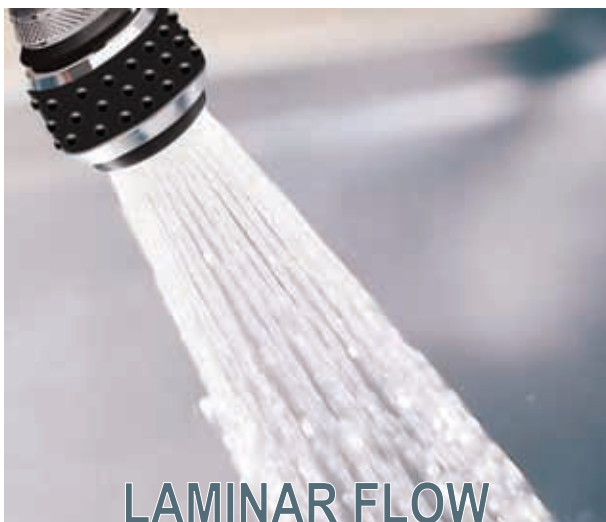

Note :-
You can add any flow to any floor mounted sink mixer with extra charges as mentioned against each flow.

MIST FLOW

₹ 500/-

Mist are special aerators with a minimal flow rate (water-saving). The atomization is achieved by dispersing the water into tiny droplets. Water flow: 0.15 gpm (approx 0.6 litre/min)

LAMINAR FLOW

₹ 400/-

LAMINAR Flow is for application in series lavatory faucets (public bathrooms exposed to walk-in traffic). Pressure compensating for near-constant flow from 0.8 to 6 bar. It reduces the consumption of water 6 times than a normal aerator.

QUARTER TURN

CONVENTIONAL

1. LONG LASTING INTERNAL FITTING ASSEMBLY

Conventional but Half Turn

- Both spindle & bonnet made of finest extruded brass rod.
- Rising type . Less number of working parts than conventional one. Hence, less chances of wear & tear, easy to maintain/replace/repair.
- Multiple transmission thread for maximum lift with minimum turn (180 +/- 20 degree turn) result is 3 mm standard lift of valve to release sufficient quantity of water.
- Anti –slip transmission thread.
- Transmission thread area (actual working area) duly lubricated with high grade engineering lubricants (silicon).
- Transmission area remains protected with “O” ring against lubrication wash-off, debris or suspended particles in water hence longevity of transmission thread is ensured.

Ceramic Disc Cartridge

- It is washerless, hence there is no issue of eventual wear & tear.
- This type of cartridge offers higher endurance & very low maintenance in the long run.
- Minimum rotation of only 90 degrees required for full flow of water.
- This cartridge is made entirely of brass.

Single Lever Cartridge

- Multi Function cartridge, mixing of hot & cold water and the flow of water can be controlled by a single lever.
- Cartridge is made of high quality ceramic disc, hence it is washer free.
- Since the cartridge is washerless, the fitting offers high endurance & low maintenance over prolonged periods of time.

2. SOLID BRASS CONSTRUCTION

- Made of highest grade brass (copper contents 58% or more).
- All of the Components assembled in final products except petty items like screw, etc. are made of brass only. No components so far, has been introduced in zinc by us.
- Made of die-cast brass (Grade DCB II as per IS) with gravity die casting procedure.

3. WATER PRESSURE SUSTAINABILITY

Appropriate & uniform wall thickness all over the body to sustain water pressure of up to 10 kgf/sq.cm.

4. STREAMLINED / AERATED FLOW

Sieve/aerator : Appropriate water straightening device i.e. sieve/aerator provided for water saving as well as anti-splash feature.

5. DURABLE EXTERNAL FINISH

Chromium Plating:

- Three layer chromium plating i.e. Copper, Nickel & chromium
- Before nickel plating each piece passes through a Copper bath (now eliminated by most of the manufacturers for taking higher production) for added luster and proper electric conductivity resulting in better adhesion of nickel & chromium on the exterior of body.
- Appropriate thickness of Nickel (10 to 25 microns) and Chromium (0.3 to 0.5 microns) for enhanced luster and enhanced life of outer surface.
- State of the art Electroplating plant.

6. EASY OPERABLE

Handle: Ergonomically designed handles/ knobs for better & anti-slip grip.

Appropriate sizing & punching of knurling for better fitment of handle/knob on internal fitting assembly.

7. UNBREAKABLE THREAD

14mm of inner diameter maintained at inlet thread to give an appropriate wall thickness in this main load area at the time of installation. Hence chances of thread breakage are almost eliminated.

8. SYNTHETIC RUBBER PARTS

Rubber parts

All rubber parts are made of synthetic rubber for better life & sealant.

9. LEAK PROOF

Double rubber sealants:

- For protection of transmission thread from dirt, particles, salt, iron or other impurities in water for enhanced life of the valve.
- For protection of lubrication agent applied on transmission thread from getting washed away with water for easy & smooth, maneuvering always & enhance life of the transmission thread.

10. ENHANCED LIFE

- Anti-rotation mechanism in valve resulting in enhanced life of seat washer as the same is being protected against getting damaged from roughage on seat.
- Endurance test done for 30000/100000 cycles * randomly.

11. APPROPRIATE SIZING

Appropriate sizing & provision of stopper in sieve / aerator fitting area, avoiding it to slip inside the tap or to slip out with pressure of water.

*Depending on models

CERAMIC (CONCEALED)

CONVENTIONAL (TAPS)

SINGLE LEVER

QUARTER TURN CERAMIC (TAP)

SINGLE LEVER

“MIY” MAINTAIN IT YOURSELF

One of the major problems that the households face is the maintenance of taps. Even for a small problem you need to call a plumber and you end up feeling that the taps you purchase are too costly. But the problem will persist even with the leading brands because the water will always have dissolved particles in it and it will always clog the aerator resulting in low flow of water.

XEN, a leading brand in quality taps brings you the solution. Along with technologically advanced, intelligent designs, value for money and 7 years warranty XEN brings to you “Maintain it yourself (MIY)” taps. Let’s learn how!

LEARN HOW TO CLEAN A TAP

To keep the exterior finish of our product i.e. Chromium Plated / Coloured Surface shining for years, clean it with the help of mild soap & water. Do not use abrasive sponge or scouring agents for cleaning.

We also advise you not to use cleaning agents containing solvent or acid, lime scale removers, household vinegar and cleaning agents with acetic acid in them.

Clean Taps with a little soap and moist cloth only, then simply rinse off and wipe dry. You can avoid lime spots (White Spots) by drying the fitting each time it is used. After drying you can apply a coat of wax polish to protect the surface from settlement of water for a considerable period of time.

LEARN HOW TO CLEAN THE AERATOR

Because of the dust, minerals and suspended particles, that comes with the water the aerator gets clogged, resulting in low flow of water. The solution is not to remove the aerator but to clean it as it helps you get streamlined and anti-splash flow of water with reduced consumption of water as well.

To clean the aerator first open the housing by unscrewing it clockwise, take out the aerator.

Wash it with water, clean it and simply attach it again. Here you go steady high flow of water. Surely you save a few bucks here.

LEARN HOW TO SOLVE THE DRIPPING TAP

Another problem that you face with the tap is the issue of dripping tap. This issue can be solved by cleaning the internal fittings and you would be happy to know that you don't need to call the plumber again.

Firstly open the ABS cap hiding the allen Screw on the tap handle.

Use the allen key (Provided with Every Box) to open allen Screw inside and remove the tap handle.

Once you remove the tap handle you will find the ceramic disc cartridge. Unscrew it with the help of a spanner by turning it anti-clockwise.

Now remove the rubber washer at the bottom of the cartridge.

Remove the two ceramic discs inside and clean it. Apply little grease on the shiny surface of both the disc.

Now put the ceramic discs and rubber washer back to its place and fit the handle back on the tap.

Here you go --- drip free tap.

So next time when you purchase a tap don't look for a cheap option, instead go for the one which gives you value for money and peace of mind.

ESSENTIAL

CATALOGUE 2019

WE
REIMAGINE
YOUR
BATHROOM

From The Desk Of Chairman
Mr. Ajit Garg

At XEN, we understand the enthusiasm that surrounds home maintenance and renovation projects. That understanding is the foundation of our company's mission: to provide the best selection of faucets, shower systems and accessories on the market. Our products are made to match the style of your home; perfect for kitchens and bathrooms alike.

We have assembled an unparalleled team of employees and created cutting-edge facilities to design, test, improve and refine our products to meet all your fitting needs, poised to provide beautiful and sophisticated high-performance faucets and shower systems.

The XEN team spares no effort to guarantee the best possible life span and superior quality for the products we offer. Our XEN products are unique, easy to install and come with a warranty.

XEN faucets have been designed for easy installation. Mechanical parts are easily accessible from above the counter, making maintenance and cleaning chores much more straightforward.

We equip all our dual-handle lavatory and bathtub faucets with High Standard ceramic cartridges. This ensures their durability and optimum performance for the system.

Our innovations and know-how are sure to exceed all your expectations.

CARE AND INSTALLATIONS

Xen constantly strives to interact with consumers and make its products consumer friendly. The company's trained staff and executive maintain a direct interface with consumers, educating them about the product quality, convenience and maintenance. Xen also believes that consumers must get the best out of its products. Hence it has evolved a set of consumer guidelines, which if followed ensure optimum and trouble free performance with enhanced durability of Xen products of years to come. The guidelines are:

DURING INSTALLATION

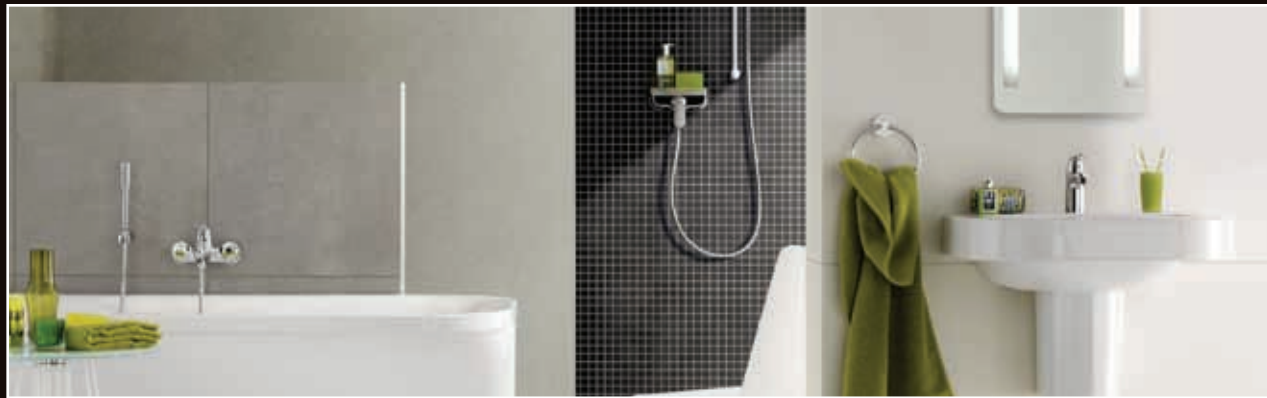

- Use 25mm pipeline instead of 20mm to ensure better flow of water. Lay the pipelines straight and vertical as far as possible.
- More than required number of bends throttle the pressure of water. Keep the number of bends in the pipelines to a minimum. All the supply lines must have vent pipes which helps in giving a smooth flow of water from the fittings.
- Center to center distance of pipe fitting for Hot & Cold inlet for all types of wall mounted mixtures should be maintained at 165mm by which any of our wall mixers can be easily installed without any problem.
- Place the outlet point in the overhead tank at least 2.5cm above the ground level of the tank. This prevents the flow of foreign particles, sand, etc. along with water supply into the fittings avoiding the possible damage to the working parts.

POST INSTALLATION

- Cover the taps with poly pack before or after their installation till they are put to actual use to protect the fine finish of fittings from dirt, stains and other damages.
- Do not use harsh cleaning agents containing abrasives and acids. Instead use of soft sponge or wet cloth with soapy water / diluted vinegar to protect the colour finish.
- Clean the aerators provided in the items at regular intervals for a perfect flow of water from the fittings. To clean the aerator, remove it, knock out the silver insert and rinse through with water.
- Clean the overhead tank thoroughly before the supply starts. It is suggested that the overhead tank must be cleaned at regular intervals to avoid deposition of foreign particles. To avoid any foreign material to pass through the taps use jali.

-
- Avoid leakage of water from taps.
 - Turn the tap off when not in use especially when you brush your teeth or wash clothes.
 - Check the leakage of water in the toilets. Also get check the hidden water leaks.
 - Never throw the water unnecessary on roads which can be used for gardening and cleaning.
 - Avoid unnecessary flushing the toilets. Use minimum amount of water to bath.
 - Water your lawn only when it is needed.
 - Do not leave the tap running while washing the dishes in the kitchen.
 - Install small shower heads to reduce the flow of water.
